

Found silence  
Antti Tolvi  
2-2024

## Found silence

Before audience enters the venue, set some nice pink noise to space. Not too loud. It should sound like something what might be in the space (like ventilation..).

Start performing (just enter the stage), after a minute, turn pink noise off. Listen that found silence for about five minutes. Then turn pink noise on again. Listen for a while. End.
