

See this piece as music, where there is long durations of silence between the clusters of playing.

*Walking quietly is silence*

*Watching something is like someone playing*

Do piece outside if possible.

You are not going anywhere, walking route is some kind of circle.

You can walk just one big circle or repeat walking around same smaller circle.

Walk and watch in silence, slowly.

If you are walking around circle many times, stop in different places each time.

Piece has sister piece *Three for solo*, which is recommended to perform just before *Walk*.
